

Introducing CompQ: A Real-Time Competency Documentation Tool

CompQ is a comprehensive, real-time competency documentation tool that allows evaluators to capture care team demonstration of competent care. This new tool integrates competency assessment, skills remediation, and documentation in one streamlined, online system, providing all you need to comply with new staff competency requirements that are part of the RoP (F-Tag 726).

By switching to CompQ, organizations can save countless wasted staff hours by eliminating inefficient paper-based checklists, forms, and spreadsheets by tracking your progress in real time. With CompQ, your staff can efficiently identify, assess, train, correct, and document the wide range of skills associated with competence in the long term care setting. The seamless electronic system can be used at the bedside and works on any smart phone, tablet, laptop, or

CompQ allows care leaders to:

- **Test each competency**, using CompQ's online checklist database covering all critical nursing, clinical, and patient care skills and procedures tracked under the new RoP;
- **Identify areas where performance must be improved**, in the specific competency by highlighting specific deficiencies in necessary skills and procedures;
- **Educate on-the spot**, using specially targeted short videos and other online lessons developed by nursing and clinical care experts to build competency in the specific skill under evaluation;
- **Document every step of each competency**, tracking ongoing skills improvement and providing full documentation to meet regulatory requirements under the state RoP survey.

Developed by expert facility nursing and clinical care professionals, CompQ goes beyond compliance to provide the targeted assessment and training to help your team deliver better patient care.
